

M² DESIGN SCOTT WILSON

Flexible by nature and ideal for large public spaces, the M² is a modular seating system designed by Scott Wilson for Quinze & Milan. Three basic units (corner, linear and level units), each 1m², supported by powder-coated steel frames fit together to form the desired configuration. Components can be interconnected or can stand alone. Light fittings can be integrated into the seating elements. M² has received enthusiastic reviews, as well as honourable mentions at the ISDA Awards and the prestigious ID Design Awards.

M² is also available upholstered in leather and fabric, and with level units in veneer (oak, zebrano,...).
Custom color or sizes are available upon request.
